Using Cyberduck for OSX and Windows

- Install Cyberduck using the default installation options. Click here for free download. For Windows download the .exe file. Mac users download the zip file and run it after downloading it
- 2. Launch the program and click Open Connection.

3. Select FTP-SSL (Explicit AUTH TLS) from the drop down menu.

4. Enter the name of the server (public.callutheran.edu), your username and password in the spaces provided.

FTP-SSL	(Explicit AUTH TLS)		
Server:	public.callutheran.edu	Port:	21
URL:	ftps://example@public.callutheran.edu:21/		
Username:	example		
Password:			
	Anonymous Login		
	Save Password		
		Connec	t Cance

- 5. Click Connect. Your FTP folder will display.
- 6. Selecting Upload will open a window to choose what file for files to upload from your computer to the server.
- 7. To disconnect from the server, click the eject button labeled Disconnect located in the upper right hand corner.

Note: Although Cyberduck is used in the his documentation, most programs that support FTP-SSL via TLS will work the same settings.
