

ChemDraw

Last Modified on 11/25/2025 3:02 pm PST

ChemDraw Professional is a drawing tool that allows users to draw chemical structures and reactions as well as biological objects and pathways. Users can also use it to predict properties and spectra, convert chemical structures to IUPAC names, view 3D structures, etc.

Faculty and students should be able to visit the PerkinElmer site, search for California Lutheran University, register for an account and then download the software.
